

## Respirator - Face Mask

Ref: 39-109-100  
Sold only in boxes of 10 masks

These respirators provide the same level of protection as the valve model (see Ref:39-109-000) but at a lower cost. Features include twin strap design, foam nose seal and flexible steel nose clip to ensure a good face seal over a wide range of face sizes. Ideal for use when polishing for short periods of time or to have on hand for the occasional 'Cyanfree' electroplating job.

## Respirator/Face Mask with Valve

Ref: 39-109-000

This respirator has a twin strap design, foam nose seal, and steel nose clip, to ensure a good face seal over a wide range of face sizes. It has a unique valve which allows your breath to be exhaled which means the mask stays cool. Other flimsy masks are hot to use as your mouth air stays trapped in the mask. The mask meets Australian Standard AS1716 and has received other government approval. This low cost respirator will give you excellent protection against most polishing compound dust, some of which contains silica, some soldering fumes and some plating solutions, etc. With government workplace and safety regulations becoming more prominent, use of this respirator could help avoid future claims from employee's and protect your own health.

Suitable for use with products such as: Auflux, Activax, Rumble Bright, Shofu Points, Silicon Carbide wheels, Dialux, Tripoli, Cyanfree Plating Solution.

## Casting Apron

Ref: 41-352-001

Made from natural leather to provide protection from small spatters of hot metals and heat when removing flasks from the furnace

590mm wide x 1060mm long

## Low Maintenance Respirator

Ref: 39-108-000

Soft silicon face piece with matt finish face seal to reduce slippage. This half face respirator offers lightweight easy breathing protection with the advantage of low maintenance and easy cleaning. When the filters are used to capacity they are quickly and easily replaced.

### Gas and Vapour Filters

Ref: 39-108-100

These filters have been designed for easy attachment to the facepiece. Simply twist off, discard and replace just as easily with new ones.

### 3M Particulate Filter & Retainer

Ref: 39-108-20 Ref: 39-108-250

This respirator is suitable for use with products such as: Investment Powder, Masking Paint, Rhodium Plating Solution, as well as all products listed under Ref: 39-109-000
